

# OUR TWO FASTEST AND MOST RELIABLE LEAK DETECTORS.

## Portable, Powerful Leak Detectors

These two Fieldpiece leak detectors are highly sensitive, durable, and more reliable than anything else on the market. Both models feature a large LCD that provides information about the leaks with bar graphs and numerical values. Their rechargeable batteries enable 10 to 18 hours of use per charge. They are designed for the field with rugged blow molded carrying cases and water resistant bodies.

### Infrared Refrigerant Leak Detector, DR82

- Good for a wide range of situations due to consistent detection across many refrigerants
- Infrared sensor lasts 10 years

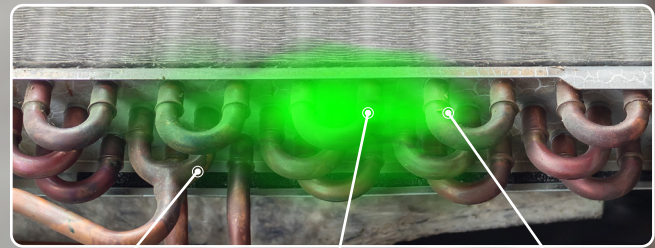

### Heated Diode Refrigerant Leak Detector, DR58

- Great on R410A refrigerant
- Field replaceable heated diode sensor

## Portable, Powerful Leak Detectors

## Find Leaks Fast with Easy to Read LCD Screen

## All in One, Replaceable Filter Tips

### DR82

### DR58

<b>Sensor Type</b>	Infrared	Heated Diode
<b>Refrigerants</b>	Detects CFC, HFC, HCFC, HFO and blends and doesn't trigger on oil or soap bubbles	Detects CFC, HFC, HCFC, HFO and blends
<b>Sensor Life</b>	10 years	300 hours
<b>Display Type</b>	LCD (backlit for indoor use)	LCD (backlit for indoor use)
<b>Detection Feedback</b>	Numerical leak size indicator, bar graph, audio speaker and lighted tip	Numerical leak size indicator, bar graph, audio speaker and lighted tip
<b>Water Resistance</b>	Certified IP54	Certified IP54
<b>Body Type</b>	Compact, rugged overmolded	Compact, rugged overmolded
<b>Battery Type</b>	USB-C Rechargeable Lithium-ion	USB-C Rechargeable Lithium-ion
<b>Battery Life</b>	10 hours	18 hours
<b>Included</b>	Rugged case, 5 replacement filter tips RFT6	Rugged case, 5 replacement filter tips RFT6
