

More Flexible. More Efficient.

Flexible and Efficient Line of Evaporative Humidifiers

In the past, the challenges with evaporative humidifiers included everything from installation in limited equipment room space to the inconvenience of disassembling the humidifier and plumbing just to install the humidifier or replace the pad.

Now, those days are gone.

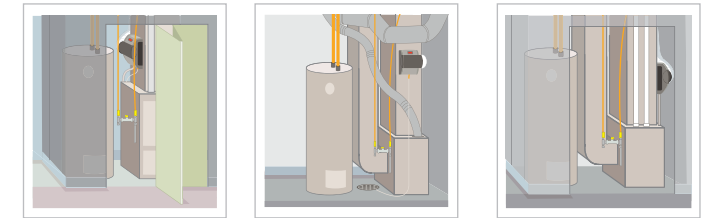

The Honeywell Home evaporative humidifiers make installation faster and more flexible, thanks to their multiple snap-into-place configuration options. Customer-friendly features include quiet operation, easy-to-replace pads and water-saving efficiency.

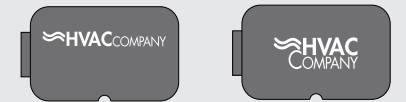

More Jobs in More Places = More Profits

Thanks to our patented design with multiple snap-into-place configuration options, obstructions such as pipes or compact spaces with water heaters will no longer keep you from providing humidification for your customers. Honeywell Home evaporative humidifiers fit more jobs to make you more profitable.

Customization + Replacement Pads = PROFIT-BUILDING REPLACEMENT SALES

Resideo helps you generate lasting relationships with your customers through profit-building replacement pad sales. The Change Pad indicator on the front of the humidifier lets homeowners know exactly when a replacement pad is needed*, and the customizable label featuring your company name and logo lets them know exactly who to call.

*Advanced bypass models & fan model only. Timer based on 12 months or 5,500 run time hours- whichever comes first.

In addition, the replacement pads work with all Honeywell Home evaporative humidifiers and other evaporative humidifier brand models, reducing your inventory.

Water and energy savings homeowners can invest in

Honeywell Home evaporative humidifiers help homeowners save water, energy and money by only running water and air through the system when humidity is needed; using up to 50% less water and can save energy by eliminating the constant cycling of air.*

Plus, since humidified air feels warmer, your customers can turn their thermostats down to help reduce heating bills.

The complete line of evaporative humidifiers helps you differentiate your business by providing upgrade options that homeowners value.

* 50% less on Fan-Powered humidifier, 30% on Advanced Bypass humidifier

** Based on a continuous runtime of 24 hours with system specifications set according to ASHRAE guideline 610.

Water and Energy Savings Homeowners Will Invest In

Evaporative humidifiers are just some of the many indoor air quality products offered by Resideo. Telling homeowners about other Resideo products like whole-house air cleaners, dehumidifiers and ventilation systems will not only offer you more sales opportunities, but will offer the homeowner a better, more energy-efficient environment.

Resideo, a leader in home comfort and indoor air quality.

Advanced Bypass Humidifier

Honeywell Home Advanced Bypass Humidifiers can eliminate time-consuming installation steps and maintenance hassles.

UP TO 30% WATER SAVINGS

Timer-metered solenoid wets the pad only as needed, reducing water waste.

ENERGY SAVINGS

Automatic damper opens and closes only when humidity is needed rather than constantly cycling air through the bypass, making the HVAC System more efficient.

Evaporative Humidification Systems

Evaporative Humidifiers

PART NUMBER	DESCRIPTION	OUTPUT
HE100	Small Bypass Basic	12 GPD
HE150	Small Bypass Advanced	12 GPD
HE200	Large Bypass Basic	17 GPD
HE150	Large Bypass Advanced	17 GPD
HE300	Fan-Powered	18 GPD

Replacement Pads and Accessories

PART NUMBER	DESCRIPTION
HC22E	Small Bypass Replacement Pad with AgION Coating
HC26E	Large Bypass and Fan Replacement Pad with AgION
H6062A1000	HumidiPRO® Digital Control with Window Protection

HUMIDIFIER TYPE	HUMIDIFICATION DELIVERY RATE (GALLONS HUMIDITY DELIVERED: GALLONS WATER WASTED)
HE300 Fan-Powered	(1:2)
HE150/HE250 Advanced Bypass	(1:2.8)
Other Fan-Powered	(1:4)
Other Bypass*	(1:4)

* Includes Basic Bypass Model.

PerfectFLO® Water Distribution Tray

Distributes water evenly across the pad.

Common-Sense Interface

LED lights indicate when the system is humidifying, when it's time to replace the pad, and when the unit needs service.

AgION Humidifier Pads

feature an anti-microbial coating to inhibit the growth of molds, bacteria, fungus and algae on the pad.

HumidiPRO® Set it and Forget It

HumidiPRO®, a digital humidistat, works with Honeywell Home Evaporative Humidifiers so there's no need to adjust humidity settings when the weather changes. HumidiPRO® humidistat makes those changes automatically to reduce condensation or frost on the homeowner's windows. To manually add a boost of moisture, the Humidity Boost feature can increase the pre-set relative humidity by 5 or 10 percent. HumidiPRO® humidistat is included with all models.

Understanding Humidification Delivery Rate and Water Consumption

Whole home humidifier manufacturers list humidification capacity as the amount of moisture a humidifier can deliver in a 24-hour period, or gallons per day (GPD). But how do you know how much water is being wasted in the process? Evaluating Humidification Delivery is a great place to start. Honeywell Home Advanced Bypass and Fan-Powered humidifiers deliver the same amount of humidity as competitive models.
