

F59 Series

Sump Pump Switch

Action on Rise
in Liquid Level

F59A-2

F59H-1

Description

The F59 Series controls are designed to start an electric motor on liquid level rise and stop the motor on liquid level drop. The control cuts in when upper weight is submerged approximately halfway, and cuts out when lower weight is approximately half-exposed. Each switch includes 36 in. cable and (2) two weights.

Features

F59D-5 is equipped with a power cord and a piggyback style plug. The male prongs plug into the wall outlet, and the sump pump cord plugs into the female end of the plug.

Applications

- On/Off control of sump pumps

Accessories

See *Replacement Parts* below.

To Order

Specify the code number from the following selection chart.

Selection Chart
